SKILLS SUMMARY

Languages:	Python, C++, Java, JavaScript
Frameworks & Libraries:	React.js, Vite, Node.js, Express.js, Tailwind CSS, Socket.IO
AI / ML:	Pandas, NumPy, Scikit-learn
Databases:	MySQL, PostgreSQL, MongoDB
Developer Tools:	Git, GitHub, Vercel, Render
Core Subjects:	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Soft Skills:	Problem-Solving, Team Collaboration, Adaptability

PROJECTS

Polaris – AI-Powered Antarctic Navigation GitHub	Sep 2026
- Architected a predictive navigation system for hazardous sea-ice routing using a hybrid PyTorch CNN and LSTM drift model, enabling safer voyage trajectories for research stations. - Engineered a dynamic A* pathfinding pipeline using ERA5 environmental data, bathymetry and Coriolis drift variables to generate optimized routes that avoid iceberg collisions. - Integrated real-time anomaly-based replanning with CesiumJS 3D visualization for an interactive voyage simulation. <i>Tech: React, Vite, CesiumJS, Python, FastAPI, PyTorch, CNN, LSTM, XGBoost, A*, ERA5</i>	
WordGame – Competitive Real-Time Word Puzzle Game GitHub Live	Mar 2026
- Developed a competitive real-time multiplayer word-puzzle platform, using Socket.IO for low-latency server-client communication during live gameplay. - Constructed a Node.js and Express.js backend that tracks scores and game progression and keeps game state synchronized across concurrent connections. - Deployed a responsive Tailwind CSS interface on Vercel, supporting consistent interaction across multiple devices. <i>Tech: Vite, Tailwind CSS, Node.js, Express.js, Socket.IO</i>	
RajaMantri – Multiplayer Indian Role-Based Game GitHub Live	Dec 2025
- Created a real-time multiplayer version of the classic Indian card game using React and Node.js, with role assignment and turn flow management. - Designed interactive state management with React and Tailwind CSS, adding card-dealing animations to the gameplay interface. - Implemented a live in-game chat feature for communication between players during competitive matches. <i>Tech: React, Tailwind CSS, Node.js, Express.js, Socket.IO</i>	

TRAINING

AI-Driven MERN Stack Bootcamp – Lovely Professional University Certificate	Jun 2026 – Jul 2026
- Learned how to build complete full-stack web applications using the MERN stack (MongoDB, Express.js, React.js and Node.js), and understood how the frontend, backend and database work together to deliver production-ready platforms. - Applied REST APIs to connect the React frontend with the Node.js backend, stored and managed data in MongoDB, and deployed the finished applications online so anyone can use them. - Gained hands-on experience with DevOps practices and the development lifecycle of production-oriented web applications. <i>Tech: MongoDB, Express.js, React.js, Node.js, REST APIs, Git, Deployment</i>	

CERTIFICATIONS / CERTIFICATES

Oracle AI Database Certified Foundations Associate Oracle	Sep 2026
Gen AI Academy Hack2Skills	Jul 2025
React JS Tech Veda	Mar 2025

ACHIEVEMENTS & EXTRACURRICULAR

Selected as Google Student Ambassador , representing Google on campus and promoting technology initiatives Certificate	Aug 2025
President , WAIVE Club — led the university web development and AI club; organized and conducted multiple workshops	Mar 2025

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology – Computer Science and Engineering — CGPA: 8.28	Aug 2024 – Present
N.N International School	Bhagalpur, Bihar
Intermediate with PCM — Percentage: 70	Apr 2022 – Mar 2023
Saint Joseph School	Bhagalpur, Bihar
Matriculation — Percentage: 87	Apr 2020 – Mar 2021
